

Aquabot[®] TURBO

THE WORLD'S
#1
SELLING
ROBOTIC POOL CLEANERS

At the Touch of a Button...

Scrubs, Vacuums & Microfilters;
Without Hoses, Pool Filter, Booster Pumps or You!

Aquabot Turbo[®] climbs 90° inclines from floor to waterline, including most stairs and benches, to automatically clean pools up to 50' in length in just 4 hours or less. Aquabot Turbo[®] is even equipped with an adjustable timer for customized cleanings and can operate with "auto-controller systems." Compare Aquabot Turbo[®] to any other cleaner and see why it *outperforms everything else!*

*Just drop it in and press a button!
No hoses to untangle, no costly
booster pumps to run, and no filter
connections to slow you down.*

With Aquabot Turbo[®] you get:

- *Maintenance cost savings of up to 50% (chemicals, water, energy)*
- *Complete cleaning of pools up to 50' in length*
- *Scrubbing brush system loosens stubborn debris*
- *Offset vacuum ports for clog-free operation and better corner access*
- *Largest capacity reusable internal filter – more debris with less cleaning*
- *Industry's healthiest filtration and water circulation*
- *Convenient pool cleaning at the touch of a button*
- *Best national robotic support network in the industry*

AQUA PRODUCTS
THE WORLD'S LEADER IN ROBOTIC POOL CLEANING SOLUTIONS

The World's #1 Selling Robotic Cleaner Gives You the Performance, Reliability & Savings That No Other Cleaner Can!

Aquabot Turbo® utilizes state-of-the-art microprocessor technology in cooperation with a multitude of sensors to completely clean pools as large as 50' long, regardless of their surface type, in a mere 4 hours or less. No wonder Aquabot Turbo® is the world's #1 selling robotic pool cleaner.

Designed with you in mind, Aquabot Turbo® offers you the convenience of complete pool cleaning – floor to waterline and everywhere in between – at the mere touch of a button. Aquabot Turbo® cuts your total pool maintenance bills (chlorine, electricity, water, etc.) by up to 50%, and helps your wallet and the environment further by saving thousands of gallons of chlorinated water through the reduction of evaporation and main pool filter cleanings as much as 80%.

Having its own built-in motors and filtration system Aquabot Turbo® operates completely independent of the pool's filtration system, eliminating the need for sloppy, tangling hoses and costly-to-operate booster pumps, as well as decreasing pool filter usage and wear up to 60%. Simply plug it in and press a button. The days of expensive yearly pool cleaner repairs are over as Aquabot Turbo® is engineered for reliable, worry-free operation, having less than 10 moving parts and cannot become stuck on stairs or ladders. Here's what else you get with Aquabot Turbo®:

Scrubbing Action - Aquabot Turbo's® front and rear rotating scrubbing brushes loosen and remove heavy dirt and fine particles from floor, walls and waterline to be vacuumed and trapped in its own internal microfilter bag.

Vacuuming - Aquabot Turbo's® exceptionally high suction power and large vacuum intake ports enable it to easily vacuum up all types of dirt and debris.

Built-in Filtration System - Aquabot Turbo® will clean and purify thousands of gallons of water per hour. Aquabot Turbo® is equipped with an expansive, reusable microfilter bag that has the capacity to hold many leaves and twigs and is capable of filtering out all types of fine particles including sand, silt, algae and bacteria. The filter bag is easily removed and rinsed clean.

Better Chemical Distribution - As a result of Aquabot Turbo's® heavy-duty pumping action, the pool's bottom and surface water are circulated, raising the overall water temperature which reduces heating costs and creates a more even distribution of chemicals which normally settle to the pool floor.

No Installation - Operation is as simple as dropping Aquabot Turbo® into your pool, plugging it into its low voltage transformer and pushing a button. It does the rest by itself. Aquabot Turbo® is the safest and easiest cleaner to use, and costs on average about 10¢ a day to run.

Low maintenance - Constructed of corrosion-proof materials, with fewer than 10 moving parts, Aquabot Turbo® requires little or no maintenance.

Free Educational DVD - Every Aquabot Turbo® comes complete with a DVD to show you how pool cleaning can be accomplished at the touch of a button.

Leading Quality Assurance & Engineering - Aqua Products® is the world's largest and leading manufacturer of robotic swimming pool cleaners. Operating in nearly 40 countries with 3 separate in-house research and development teams, Aqua Products® employs the highest quality assurance manufacturing and design processes to ensure the best engineered products. From separate internal motor casing for lower long term repair costs to using brushless DC motors for limitless operating hours without failure to using drive belts that reduce drive motor load for lower wear, Aquabot Turbo® is engineered specifically for the harsh conditions incurred within the swimming pool environment.

Aquabot Turbo® Scrubs pool walls and waterline while it Vacuums and Filters out pool dirt and debris.

Aquabot Turbo's® self-contained filtration system removes large debris and particles as small as 2 Microns.

Specifications

| | |
|-------------------------------|---|
| Designed for Pools: | Up to 50' length of any surface |
| Suggested Cleaning Time: | 4 hours (50' pool length) |
| Customization: | Yes, adjustable timer allows for customized cleaning cycles up to 7 hours or can operate automatically with auto-control pool equipment |
| Filtration Quantity: | 4,200 gallons per hour |
| Cleaning Coverage: | 6,500 square ft. per hour |
| Electrical Requirements: | 115v / 60Hz |
| Filtration System/Capacity: | self-contained, 19-quart capacity; Large leaves to fine particles – down to 2 microns |
| High Volume Filter Pump: | Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life |
| High Performance Drive Motor: | Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life |
| Drive System: | Indirect belt drive - reduces stress load for longer drive motor life |
| Cord: | 61 ft. - buoyant thermoplastic rubber – No chlorine corroding Kevlar® |
| Operating Cost: | Approximately 10¢ per cleaning cycle |
| Wattage: | 155 Watts |
| Voltage: | 115 V / 60 Hz, 31V at cleaner |
| Warranty: | Up to 2 years with consumer registration |
| Safety & Reliability: | Cleaner, cord and power supply are ETL listed to UL Standards — the highest safety and reliability certification in the industry |
| Unit Dimensions / Weight: | 16" x 14.5" x 10" / 17.5 lbs. |
| Shipping Dimensions / Weight: | 17.5" x 17.5" x 19.5" / 38 lbs. |
