Clean Pools, Ponds
And Fountains . . .
In Half The Time!

POWER HANDI Vac

The Power To
HydroScrub, Vacuum
and Microfilter Your Pool
When and Where You Need To!

Power Handi Vac Is Completely Self-Contained

Built-In Vacuum Pump

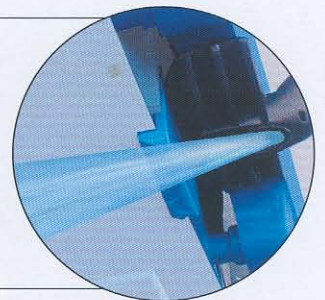

Internal, Cleanable and Reusable Filter Bag

High Pressure Hydroscrubbers Lift Dirt and Debris

The revolutionary Power Handi Vac is the only completely self-contained manual pool vacuum with the filter pump and a filter bag built directly into the vacuum head. Power Handi Vac simply attaches to your standard pool pole and is easy to guide around the pool. This efficient design provides greater vacuum power at a fraction of the operating cost of other manual vacuums. With the pump in the head, the head doesn't lift off the pool floor, as with other "hand vacuum" systems, providing you with 50% faster cleaning speeds.

Patented Technology Ensures Thorough Cleaning

Every Power Handi Vac model is equipped with Aqua Products' exclusive Hydroscrubbers. The Pump Motor redirects filtered water, under high pressure, through tubes back to the bottom of the Power Handi Vac forcing streams of water to scrub sand, algae and other debris up and out of porous pool surfaces, where brushes can't reach, into the vacuum path for microfiltration by Power Handi Vac's on-board

All types of dirt and debris, from large leaves and twigs down to sand and algae, are trapped in Power Handi Vac's internal, reusable microfilter bag. Clean, microfiltered water is then immediately returned to the pool. With Power Handi Vac there are no hoses to fumble with or prime and no dangerous high-voltage pump at poolside.

There Is A Power Handi Vac For Every Application

Power Handi Vac 100
16" Wide Power Head
Filters 80 GPM
Weight 16.5 lbs.

Power Handi Vac 200
21" Wide Power Head
Filters 180 GPM
Weight 26 lbs.

Power Handi Vac 300
31" Wide Power Head
Filters 220 GPM
Weight 36 lbs.
